CHEMISTRY

PAPER 1

JULY/AGUST2026

2 HOURS

KAMPALA EXCELLENCE EXAMINATION BOARD (KEEB)

JOINT MOCK 2026

UGANDA CERTIFICATE OF EDUCATION

CHEMISTRY

PAPER ONE

TIME: 2HOURS

INSTRUCTIONS TO CANDIDATES

- This examination paper consist of **two** sections **A** and **B**
- It has **six** examination items.
- Section **A** has two compulsory items.
- Responses to section **A** must be written in the spaces provided.
- Section **B** has two parts **I** and **II**,respond to only one item in each part.
- Responses to section **B** must be written in the answer booklets provided.
- Respond to **four** items in all.
- Responses to each item in section **B** should be in **table format** in the fresh page.
- Any additional items responded to **will not** be scored.

FOR SCORERS USE ONLY

Items	1			2			3			4			5			6		
Basis code	T	D	E	C	X	I	P	S	B	P	S	B	N	M	Be	N	M	Be
Weighted score																		
Scorers initials

PLEASE TURN OVER

SECTION A

Respond to all items in this section in the spaces provided

ITEM ONE

Two students of a certain campus had a promo party of s4 and s6 students ,the students started being sick after the party and school administration started thinking on what to do ,two students from senior four in the names of Natasha and Jonathan were both diagnosed with bacterial infection from bukedeia health center iii , they were both given different products , Natasha took streptomycin and codeine tablets while Jonathan only took codeine .after a while Natasha recovered while for Jonathan headache only was cured but the infection persisted and this brought confusion in them .

Task : as a chemistry student

(a) Identify the categories of the of the products used by two students

.....

.....

.....

.....

.....

(b) Explain how each product functions in each case

.....

.....

.....

.....

.....

© Guide the students on the side effects of the products used by the students .

.....

.....

.....

.....

.....

.....

.....

.....

(e) Help the students to know the similarities and a difference between the two products used by the students .

ITEM TWO

A certain group of scientists wanted to use the elements X, Y and Z in their scientific research but the properties they are to depend on to choose the best is determined by the hardness, density and melting points of these elements. The table below was presented to them but they didn't know to account for them.

Elements	Atomic number	Hardness	Density	Melting point
A	3	0.6	0.534	181
B	11	0.5	0.971	98
C	19	0.4	0.862	63

Task: As a chemistry student ,help them

(a) Categorize the elements under discussion.

(b) Guide the scientists on the other properties of the elements X and Z that makes them useful.

.....

.....

(c) Explain the variation in their melting point, density and hardness.

.....

.....

.....

.....

(d) Understand the environmental threats of these elements.

.....

.....

.....

.....

SECTION B PART 1

Attempt one item

ITEM THREE

Recently, there have been complaints of high fuel costs in Uganda. These include the high costs of petrol (6600/=), diesel (6400), and paraffin (6000) per liter among others due the war between Iran and United States and Israel. As a result, the government has signed some contract with foreign investors to set up crude oil refinery plant in Hoima District, to tap the oil deposits in the area. The residents however are protesting the establishment of the plant in their area, claiming that they need to be informed about about the production process, social and economic benefits of the plant and any side effects of the process of production and their possible mitigations.

A radio talk show has been organized on one of the local radio stations by the Government Development Team (GDT) and the local representatives to sensitize the locals on the issues at hand.

Task:

Prepare a presentation you would make upon invitation.

ITEM FOUR

In Uganda aluminum products are widely used in everyday life, especially in the manufacture of utensils, roofing sheets and electrical components. To ensure a reliable supply of aluminum, the government is considering establishing an aluminum production plant in a selected area. However the locals need to be sensitized about the industrial process involved, the social and economic benefits of the process of production , the possible side effects and their possible mitigations , your head teacher has been identified to lead the sensitization of the community .

Task

Make a presentation which the head teacher will use in the sensitization of the community.

Section B part two

Attempt one item

ITEM FIVE

Recently, significant petroleum reserves were identified in the region of western Uganda. Following this discovery, the government approved a foreign company to carry out oil extraction in the area.

However, many local residents are anxious about the possible environmental effects of the activity, in response, the local are council leadership has organized a community consultative meeting to address the concerns of the people.

You have been invited as a student with knowledge of natural resources to speak to the community members about the category of the natural resource, reason to the category, compositions of the resource, impact of the human activity to the natural resource and importance of preserving the SSnatural resource.

Task

Make a write up for your speech

ITEM SIX

Several timber –processing factories in Uganda are facing challenges due to the rapid depletion of forest resources caused by deforestation and urban development, although the government has introduced policies promoting sustainable forest management, factory managers report these efforts have had little impact because many workers and community members do not fully understand the chemical and environmental impacts of forests.

You been invited as a learner of chemistry on industrial training to contribute to the worker shop organized about the category of the natural resource, reason to the category, compositions of the resource, impact of the human activity to the natural resource and importance of preserving the natural.

Task

Use your chemistry knowledge to create awareness to the people

END
